

HYDROGEN DIALOGUE to be held already in September 2022

- **Earlier for the industry: HYDROGEN DIALOGUE on September 21-22, 2022**
- **Live at last: hydrogen industry meets live for the first time in Nuremberg**
- **Important industry meeting for over 800 international experts**

The next HYDROGEN DIALOGUE - Summit & Expo will take place earlier in the year and will be already held from September 21-22, 2022 at the Exhibition Center Nuremberg as well as on a digital event platform. NürnbergMesse is thus following the many requests from the industry to meet again in person as soon as possible. The new, earlier date in September was found in close consultation with partners and industry representatives.

"When the innovations keep on emerging like now, then an early and regular exchange is needed. With the new date for the third HYDROGEN DIALOGUE, we are fulfilling the wish of the hydrogen community to exchange ideas again as soon as possible, in Nuremberg and digitally," says Dr. Roland Fleck, CEO NürnbergMesse Group. After the first two successful events, which were held purely digitally, NürnbergMesse and its partners have found a date for the next HYDROGEN DIALOGUE in Nuremberg. "We thank you for the numerous constructive discussions with industry representatives and our partners, who were important drivers for this decision. Together with the exhibitors, we are looking forward to be the meeting point of the hydrogen industry from September 21-22, 2022 in Nuremberg!", explains Jasmin Rutka, Event Director of the HYDROGEN DIALOGUE.

Save the Date: September 21-22, 2022

The enormous market potential and the growing importance of the hydrogen technology makes this industry meeting so important. More than 800 national and international participants from business, politics and science exchanged views on relevant topics of the global hydrogen economy at the two previous events each. "After the two purely digital editions of the HYDROGEN DIALOGUE, the hydrogen economy is now eager to meet live in Nuremberg and to jointly advance the implementation and scaling of the hydrogen technology. In addition to a top-class lecture program on currently relevant topics in the field of hydrogen, we are looking forward to comprehensive company and project presentations by renowned companies," adds Event Director Jasmin Rutka.

Since September 2021, the Exhibition Center Nuremberg has again successfully hosted exhibitions and congresses that are held under the standards of a sustainable hygiene concept that has been extremely positively and responsibly received by exhibitors and visitors. The HYDROGEN DIALOGUE, which will be held for the first time in 2022 as a hybrid format, thus offers national and international decision-makers and experts from industry, politics and science along the entire value chain of the hydrogen economy an industry meeting place where exchange at eye level, networking and business can take place with a good feeling. The basis for this is the already successfully implemented hygiene and access concept of NürnbergMesse, which combines the needs for personal exchange on the one hand and security on the other in the best possible way.

About the Center Hydrogen.Bavaria (H2.B))

The conceptual partner of the event is the Center Hydrogen.Bavaria (H2.B), the central strategy and coordination office of the Free State of Bavaria for hydrogen issues, which also coordinates the activities in the Hydrogen Alliance of Bavaria with its now over 230 members.

They are part of a dynamic hydrogen community that brings together decision-makers and experts from politics, industry and science in Germany and internationally..

About the NürnbergMesse Group

The NürnbergMesse Group is one of the 15 largest exhibition companies in the world. It is made up of NürnbergMesse GmbH and its 15 subsidiaries and affiliates. Around 900 employees work for the company at eleven locations in Germany, Brazil, China, India, Italy, Greece, Austria and the USA. In addition, the NürnbergMesse Group has a network of foreign representatives in over 100 countries. The portfolio comprises around 120 trade fairs and congresses, which focus as presence events and digital events on the five subject areas of Retail & Consumer Goods, Building & Construction, Process Technology, Electronics & Security and Social & Public. Their events secure jobs and generate billions of euros in tax revenue and purchasing power effects every year. This makes NürnbergMesse an important economic driver for the Nuremberg Metropolitan Region and the whole of Germany.
